After playing the original game for several years, I decided to make a new version. In the project I used the graphics engine of the game Phoenix 2006. This engine also allows us to change the graphics, sounds, ... in new versions of the game and also those who already have it. But for now the game is just a project that we began and for that we are working on it with our free time, so we make it available in the form of the hack Phoenix 2.6.4, a hack that can be found on this section of Hack7. We still have many things to add, optimize, and expand, as I am also developing a game in 3D, however, the first game that I made with this engine is Phoenix 2.6.4. The update contains many improvements, such as new gameplay, new graphics, new sound effects and music, and much more. I am sure you will love it, as I do.
